Github: <https://github.com/kanishkawasthi>

Email: kanishkawasthi@gmail.com

Mobile: +91 8209146971

SKILLS

Languages: C++, Python, C, java, javascript
Tools/Platforms: MongoDB, React.js, Node.js, Express.js, Git, GitHub, Postman, Vercel
Soft Skills: Problem-Solving, Team Player, Adaptability

PROJECTS

Jeep Club & Off-Road Event Management System | C++, JavaScript, HTML/CSS, Node.js — 2026

- Designed and implemented a full-stack club management system using custom Singly Linked List and Queue data structures to handle member records and event waitlists, replacing array-based storage for O(1) insertion/deletion efficiency.
- Built a FIFO waitlist mechanism that automatically promotes the next eligible member when a registration is cancelled, ensuring fair and real-time seat allocation across multiple concurrent events.
- Developed parallel implementations in JavaScript (browser-based UI with persistent localStorage) and C++ (CLI application), demonstrating consistent DSA logic across both platforms.
- Engineered a lightweight Node.js static server for local hosting, and structured the app around modular Member/Event/Registration entities supporting create, update, delete, and search operations.
- Delivered a dashboard with live tracking of member counts, active events, registrations, and waitlist status, along with a full audit history log of all registration activity.

MY Music player:

2024

- A Music Web page created by using technologies like VS code as an platform and languages like HTML, CSS, Javascript.
- In this webpage User can play/pause the music play their favorite music with speed control, and download options and also have an play all option to play all songs in one click.

TRAINING

Summer Training — C++ & Data Structures

Summer 2026

- Strengthened core C++ programming concepts including OOP, structures, pointers, dynamic memory allocation, and problem-solving through hands-on implementation.
- Implemented and applied fundamental Data Structures and Algorithms, including Singly Linked Lists and FIFO Queues, with operations such as insertion, deletion, searching, traversal, enqueue, and dequeue.
- Developed a Jeep Club & Off-Road Event Management System using C++ to demonstrate practical applications of DSA, including member management, event registration, and automated FIFO-based waiting-list management.
- Analyzed time complexity of major data-structure operations and practiced efficient algorithm design, debugging, testing, and memory management.

CERTIFICATES

Data Structures and Logic Building |
Programming Using C++ |
Cyber Smart |
Linux Commands and Shell Scripting |

Lovely Professional University (LPU) Aug '26
Infosys Springboard Aug '25
WNS Cares Foundation Jul '25
Skillera Nov '24

EDUCATION

Lovely Professional University
Bachelor of Technology
Computer Science and Engineering; CGPA: 7.03

Phagwara, Punjab
Aug' 26 – Present

Carrier Point School
PCM; Percentage: 74.60%
10th Percentage: 90.0%

Sawai Madhopur, Rajasthan
july' 22 – May' 23
july' 20 – May' 21
